

## **2022 San Bruno Police Department Military Equipment Use Report**

Ryan Johansen  
Chief of Police

CITY OF SAN BRUNO  
POLICE DEPARTMENT

Pursuant to California Government Code §7070(d)(6), and in accordance with California Government Code §7072 and San Bruno Municipal Code §2.52, this is 2022 Annual Military Equipment Use Report for the San Bruno Police Department. This report has been submitted to the San Bruno City Council, and is publicly available on the Police Department's internet website.

The San Bruno Police Department does not possess any tactical equipment that it has obtained from the military, nor does it possess any equipment that was designed for military use. The San Bruno Police Department also has not acquired any equipment through military surplus programs such as the 1033 Program.

California Government Code §7070 provides a list of equipment types that are considered to be "military equipment" for purposes of this policy requirement, and this Annual Military Equipment Use Report includes information for any such equipment types that are possessed by the San Bruno Police Department, or reasonably likely to be deployed in San Bruno by its law enforcement partners.

California Government Code § 7070(c) defines Military Equipment as any of the following:

1. Unmanned, remotely piloted, powered aerial or ground vehicles.
2. Mine-resistant ambush-protected (MRAP) vehicles or armored personnel carriers. However, police versions of standard consumer vehicles are specifically excluded from this subdivision.
3. High mobility multipurpose wheeled vehicles (HMMWV), commonly referred to as Humvees, two and one-half-ton trucks, five-ton trucks, or wheeled vehicles that have a breaching or entry apparatus attached. However, unarmored all-terrain vehicles (ATVs) and motorized dirt bikes are specifically excluded from this subdivision.
4. Tracked armored vehicles that provide ballistic protection to their occupants and utilize a tracked system instead of wheels for forward motion.
5. Command and control vehicles that are either built or modified to facilitate the operational control and direction of public safety units.
6. Weaponized aircraft, vessels, or vehicles of any kind.
7. Battering rams, slugs, and breaching apparatuses that are explosive in nature. However, items designed to remove a lock, such as bolt cutters, or a handheld ram designed to be operated by one person, are specifically excluded from this subdivision.
8. Firearms of .50 caliber or greater. However, standard issue shotguns are specifically excluded from this subdivision.
9. Ammunition of .50 caliber or greater. However, standard issue shotgun ammunition is specifically excluded from this subdivision.
10. Specialized firearms and ammunition of less than .50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue

service weapons and ammunition of less than .50 caliber that are issued to officers, agents, or employees of a law enforcement agency or a state agency.

11. Any firearm or firearm accessory that is designed to launch explosive projectiles.
12. "Flashbang" grenades and explosive breaching tools, "tear gas," and "pepper balls," excluding standard, service-issued handheld pepper spray.
13. Taser Shockwave, microwave weapons, water cannons, and the Long-Range Acoustic Device (LRAD).
14. The following projectile launch platforms and their associated munitions: 40mm projectile launchers, "bean bag," rubber bullet, and specialty impact munition (SIM) weapons.
15. Any other equipment as determined by a governing body or a state agency to require additional oversight.
16. Notwithstanding paragraphs (1) through (15), "Military Equipment" does not include general equipment not designated as prohibited or controlled by the federal Defense Logistics Agency.

This Annual Military Equipment Use Report includes the following information for each type of military equipment utilized by the San Bruno Police Department:

1. A summary of how the military equipment was used and the purpose of its use
2. A summary of any complaints or concerns received concerning the military equipment
3. The results of any internal audits, any information about violations of the military equipment use policy, and any actions taken in response
4. The total annual cost for each type of military equipment, including acquisition, personnel, training, transportation, maintenance, storage, upgrade, and other ongoing costs, and from what source funds will be provided for the military equipment in the calendar year following submission of the annual military equipment report
5. The quantity possessed for each type of military equipment
6. If the law enforcement agency intends to acquire additional military equipment in the next year, the quantity sought for each type of military equipment

The San Bruno City Council uses the Annual Military Equipment Use Report as a mechanism to ensure the San Bruno Police Department's compliance with its Military Equipment Use Policy, and to help it determine whether to approve, revise, or revoke components of the Military Equipment Use Policy for the subsequent year.

The remainder this Annual Military Equipment Use Report is divided into two sections. Section One lists qualifying equipment that is owned and/or utilized by the San Bruno Police Department. Section Two lists other qualifying equipment that is not owned or regularly utilized by the San Bruno Police Department, but which is known to be owned and/or utilized by the North County Regional SWAT Team, for which the San Bruno Police Department is a participating agency. While the equipment in Section Two is not purchased, owned, or maintained by the San Bruno Police Department, it could be used in the City of San Bruno if NCR SWAT is deployed, and is therefore included in this report. It is important to note that NCR SWAT is generally only deployed in extreme circumstances such as active shooter incidents, hostage situations, and the execution of high-risk search and arrest warrants. The equipment NCR SWAT possesses is rarely deployed but could prove essential to emergency operations when needed.
