

Because of limited testing capacity, the number of cases detected through testing represents only a small portion of the total number of likely cases in the County. COVID-19 data are reported as timely, accurately, and completely as we have available. Data are updated as we receive information that is more complete and will change over time as we learn more. Cases are lab-confirmed COVID-19 cases reported to San Mateo County Public Health by providers, commercial laboratories, and academic laboratories, including reporting results through the California Reportable Disease Information Exchange. A lab-confirmed case is defined as detection of SARS-CoV-2 RNA in a clinical specimen using a molecular amplification detection test. Cases are counted by episode date; episode date is defined as the earliest of: case symptom onset date, sample collection date, date of laboratory result, or date of death. Deaths reported in this dashboard include only San Mateo County residents; death data last updated May 12, 2022.

COVID 19 Vaccinations of San Mateo County Residents as of 5/17/2022

 **699,347**

Individuals with at least 1 dose

COVID 19 Vaccinations

%5+ Vaccinated

Top 20 Vaccinated Cities (%5+ Vaccinated)

Vaccinations by city are calculated by geocoding and aggregating self-reported addresses by city or town. In instances where geocoding is not possible (due to missing street addresses), counts of self-reported city of residence are aggregated with counts of geocoded addresses. Vaccinations with addresses that are not successfully geocoded or where city of residence is missing cannot be assigned to a corresponding city. For geographies with smaller populations, such as Pescadero, there is some likely inaccuracy in calculated vaccination rates due to geocoding errors and instability of vaccination counts and population counts. Please interpret this map with caution.

Vaccinations administered as part of federal health care organizations or programs such as the Department of Veterans Affairs (VA) report to federal immunization systems, may not report into CAIR2, and may not be included in vaccination numbers on the dashboard.

COVID 19 Vaccinations of San Mateo County Residents

Vaccinations for San Mateo County residents are reported to SMC Public Health via the California Immunization Registry (CAIR2). COVID-19 vaccine administration data are reported as timely, accurately, and completely as data become available. Previous data will change as new and updated data are received.
